

# Software Asset & License Management Features

VIZOR's Software Asset & License Management module follows ITIL best practices that makes it easier to manage software licenses and associated purchases. Here are the top 10 features most beloved features by our customers, followed by several features that makes VIZOR stand out from other solutions on the market.

## TOP 10 FEATURES

### 1. Timely Reminders

Stay on top of license subscriptions, maintenance renewals and compliance position with timely email alerts and reminders.

### 2. Effective License Position Report

Find out if you are license compliant by simply viewing the Effective License Position report for a status update.

### Licensing Alerts

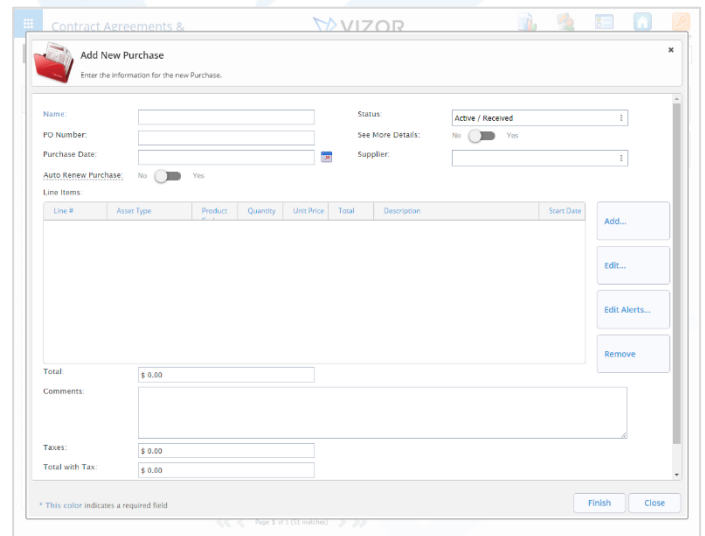

Get alerted when you surpass a certain number of licenses. Likewise, set up alerts for when you are non-compliant.

### 3. Managing Cloud and SaaS Subscriptions

Although known for managing lifecycles of software licenses, VIZOR can manage subscriptions as well.

### 4. Vendor Management

Store vendor information, like contracts and warranties, with their corresponding software licenses and purchases in VIZOR.

### 5. Powerful Reporting

Export one of the out-of-the-box reports or use the custom report builder to extract the key performance indicators most important to your organization.

### Subscribe to Reports

Simply subscribe to a report and set the frequency you want to receive it. No need to create reports every week or month!

***VIZOR is available in the cloud or on-premises***

## 6. Active Directory Integration

Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company. Also, use Active Directory to authenticate and populate employees in VIZOR.

## *Import your Software Assets from a spreadsheet!*

## 7. Software Normalization

After obtaining the data about your software assets from a spreadsheet, Microsoft SCCM or our Discovery Tool, VIZOR transforms raw inventory data into usable information for license and software asset management by eliminating noise from inventory data such as garbage versions, patches and driver updates.

## 8. Employee Onboarding

Predetermine employee requirements and set up VIZOR to automatically allocate the licenses to new employees.

## 9. Microsoft ECM Integration

Integration with Microsoft Endpoint Configuration Manager (formerly known as SCCM) makes it easy to complement your current infrastructure with powerful IT Asset Management processes from VIZOR.

## 10. Document Repository

Central repository for proof of purchases and certificates related to your software assets. Upload documents into VIZOR or link to documents in your SharePoint and/or Alfresco accounts.

## MANAGEMENT

### Automate License Allocation

Automatically allocate licenses to the appropriate employee or assign it to a computer, department, or location.

### Manual License Allocation

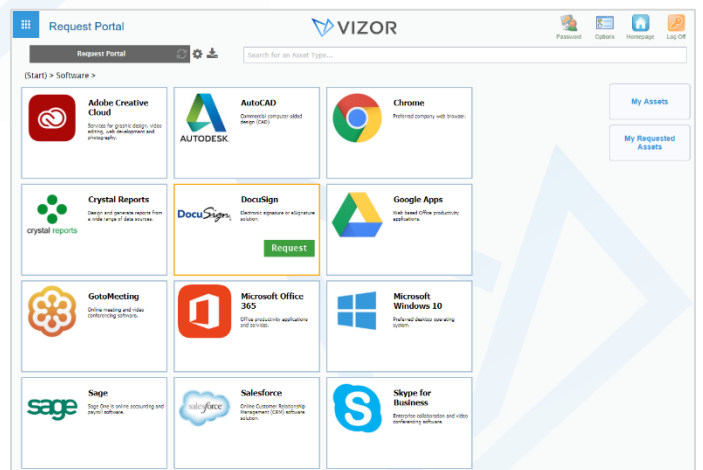

Manually allocate licenses to the appropriate employee or assign it to a computer, department, or location.

### Multi-level Approvals

Streamline multi-level approvals with automated reminders and contingencies when approvers are on vacation.

### Request Portal

Use the software license portal to help streamline software requests and never leave IT in the dark (no shadow IT) about new software purchases.

### License Compliance

VIZOR compares purchases to installations and determines whether you are license compliant. It supports different compliance schemes like per CPU and per core licensing.

## License Recycling

Automatically remove licenses from employees when they leave the company or change departments.

## License Key Allocation

Allocate license keys and serial numbers to specific users or computers based on the vendor's requirements.

## Store Documents

Store documents related to your license purchase agreements, maintenance contracts and service costs in VIZOR.

## License Reservation

A given quantity of software licenses can be reserved for departments, projects or locations. This allows managers to purchase licenses centrally, but easily reserve given quantities for segments of the organization. Any user or device allocation automatically takes their allocation from the appropriate reservation pool (for example, an employee of that department).

## Network Discovery

Grabs installations off Windows desktops, laptops, servers and virtual machines into your VIZOR solution.

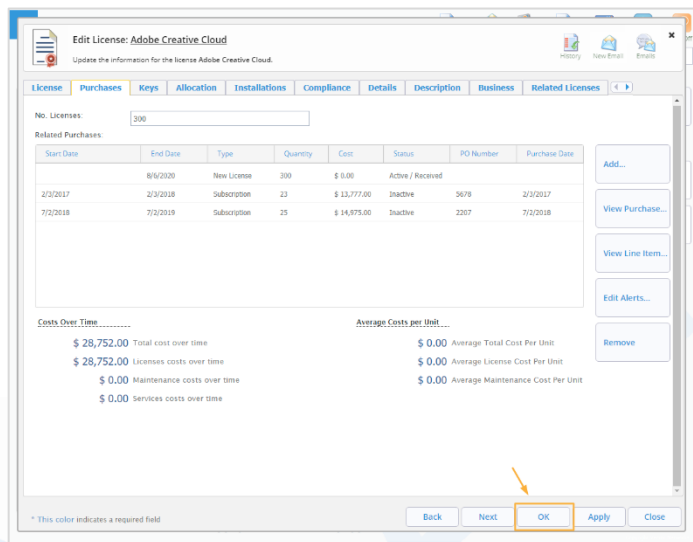

## EXPENDITURE

### Set up Recurring Purchases

Monitor cloud or SaaS subscriptions by automatically updating their costs in VIZOR. Examples include Salesforce, Amazon AWS, and Microsoft Azure.

## Track Costs

Easily track purchase costs, costs over time and maintenance costs for your software licenses, entitlements, and subscriptions. For example, subscription web apps like Salesforce and cloud computing platforms such as Amazon AWS and Microsoft Azure.

## Forecast Costs

Using the information it holds for previous purchases, VIZOR can help you forecast software expenditure.

## EFFICIENCY

### Reserved Licenses

From your pool of licenses, assign a group of licenses to a department or project. The manager can distribute accordingly.

### Export Data

Quickly download software data in multiple formats including CSV, XSL or HTML for reports.

### Suite Consolidation

Group identified applications into suites or software bundles.

### **Activity Tracking**

Track any changes made to a software asset (like an update or new allocation) through the activity log and the *history*.

## **PERSONALIZE**

### **Custom Fields**

Organizations can customize fields in their VIZOR solution, allowing them to follow their industry standards.

### **Custom Filters and Queries**

VIZOR makes it easy to sort through data with pre-set queries, categories, a search bar and the ability to customize filters.

### **Personalized Dashboard**

VIZOR's dashboard can be personalized to display the key performance indicators most important to your role.

### **Include Your Logo**

Customize VIZOR's color scheme and embed your organization's logo for an improved internal branding experience.

## **VIZOR ADD-ONS**

*Some have additional costs:*

### **Custom Licensing Compliance Engine**

If a vendor has a unique license distribution, VIZOR can support custom license compliance calculations for an accurate Effective License Position.

### **License Key Discovery**

Track discoverable license keys stored in computers and link them to the appropriate software asset or license record. For certain software, this may help you identify potentially incorrect installations.

### **Usage Monitoring**

With an agent on every computer, VIZOR can track software usage for a deeper analysis of your assets.

## **INTEGRATIONS**

*Notable integrations:*

### **Lansweeper**

Extend Lansweeper's agent-less, multiple platform network discovery capabilities with VIZOR's best practice IT Asset Management processes.

### **Active Directory**

Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company.

### **Email Integration**

VIZOR integrates with email services including on-premises Exchange and cloud-based Office 365.

### **Purchasing Integration**

Integrate with purchasing systems, from an Excel Spreadsheet to Microsoft Dynamics. This allows your team to view and simply select the relevant purchase orders and/or line items and link them to an appropriate license or subscription.
